#### IN THE CLAIMS

Amend claims 29, 30 and 32 as follows:

29.(twice amended) A digital transmission system comprising a transmitter and a receiver, for transmitting wide-band digital information having a sample frequency  $F_s$  via a transmission medium, and for receiving said information,

said transmitter having an input terminal for receiving said information to be transmitted, in the form of a first digital signal; an output; and a signal source, having an input coupled to said input terminal, for generating and supplying to said output a second digital signal which includes said information, said second digital signal comprising consecutive frames, each frame comprising a plurality of information packets, and each information packet comprising  $N$  bits, where  $N > 1$ ,

said receiver comprising a decoder and an output terminal, said decoder having an input for receiving said second digital signal and an output coupled to said output terminal for supplying said wide-band digital information, characterized in that, in the formula
